

The CP-1 cupric control system provides a complete chemical control package for the control of cupric chloride etchant. Copper, Acid normality, and oxidation potential are independently measured and controlled using a time proven analytical procedure. The system monitors both internal and external systems for faults and alerts the operator with an audible alarm.

### PRODUCT FEATURES:

- Complete Control System
- Includes Dosing Pumps
- Measures
  - A) Copper Metal Concentration
  - B) Acid Concentration
  - C) Oxidation Concentration
- Simple Installation
- Installation Kit provided
- High - Low Alarms On All Channels
- Over Pump Alarm All Channels
- Low level Alarm On Chemical Feed Drums
